*“turning houses
into homes”*

The 10 tools that EVERY home should own...

Hi there! I'm Corey.

Thanks for downloading this list. With the tools on this list you will find that you can fix almost anything around your house without too much trouble at all! If you want to buy an item, just click on the blue text to check it out further. Here we go...

10) [Painting kit](#) - Including a brush, Tray and Roller. A drop sheet is useful but an old bed sheet would do.

9) [RawlPlugs](#) - These little things let you hang just about anything on your Gyprock walls (drywall).

8) [Tray of Screws and Nails](#) - Will get you out of any trouble when a screw goes missing, or a minor fix is in order.

7) [Stanley Shifter](#) (Wrench) - Do up any nut or bolt, don't waste time with a low quality shifter.

6) [Stanley Knife](#) - Very useful for cutting or scoring.

5) [Long Nose Pliers](#) - Handy for pulling out nails and bending steel wire

4) [Estwing Hammer](#) - A good mid-range hammer that will last.

3) [Screwdriver Set](#) - Will get any toy open or repair done around the home.

2) [Good Quality Drill Bit Set](#) - Cheap drill bits simply don't last.

1) [Bosh Cordless Drill](#) - Makes any job just that much simpler

Having these tools will get you out of many a situation at home.. but if you want me to come and give you a hand, [grab a free quote](#), or give me a call on the number below:
